EDUCATION

Channabasaveshwara Institute of Technology

Tumkur, Karnataka

Bachelor of Engineering in Artificial Intelligence and Data Science Engineering

Dec 2022 – Jun 2025

- Achieved a cumulative score of 7.62 CGPA.

Siddaganga Polytechnic Tumkur

Tumkur, Karnataka

Diploma in Computer Science & Engineering

July 2019 – Nov 2022

- Graduated with a score of 75 percent, establishing core computational logic and structures.

Aryan High School

Tumkur, Karnataka

Karnataka State Secondary Education Examination (Class 10th)

Jun. 2018 – Apr 2019

- Completed secondary examinations with a score of 74 percent.

EXPERIENCE

Seventh Sense Talent Solutions

Bengaluru, Karnataka (Remote)

Machine Learning Intern — Training Scheduler Application

Oct. 2024 – Dec. 2024

- Designed and programmed machine learning prediction modules in Python to optimize match schedule configurations.
- Engineered probability prediction algorithms to estimate outcomes based on historic matchups and player statistics.
- Integrated external environmental variables (such as weather conditions and audience engagement levels) to optimize forecasting model accuracy.

PROJECTS

BookMyShow

MERN Stack

ReactJS, Node.js, MongoDB, Express.js, Redux, JWT Authentication

Full Stack Developer

- Developed a movie ticket booking platform with an interactive 10x10 seat allocation grid and real-time status tracking.
- Designed dual-interface portals, creating an Admin dashboard to manage movies/shows and a User portal for secure seat selections.
- Implemented clean search algorithms and categorization rules to filter movie selections.

LMS Platform

MERN Stack

ReactJS, Node.js, MongoDB, Express.js, Redux, Video streaming

Full Stack Developer

- Architected a Course Enrollment & Learning Management System with role-based student/instructor route protection.
- Programmed custom video player integration that automatically saves and tracks student course completion progress.
- Built an instructor portal tracking course enrollments, completion rates, and analytics dashboards.

AI-driven Tourist Recommendation System with Chatbot

AI & Web

Python, JSON, NLP Models, JavaScript, HTML, CSS

AI / NLP Developer

- Built an AI-based tourist recommendation system utilizing location and preference datasets to output custom travel itineraries.
- Configured an NLP-driven travel chatbot facilitating real-time route adjustments and packing recommendations.

ML-based Match Scheduling & Win Probability Prediction

Machine Learning

Python, Machine Learning, Scikit-Learn, Pandas, Matplotlib

ML Engineer

- Programmed schedule optimization modules using mathematical constraint matching.
- Engineered win probability prediction engines using historical matchup data and player profiles.
- Integrated live weather features and audience size metrics to maximize prediction model accuracy.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, Tailwind CSS

Backend: Node.js, Express.js

Database: MongoDB, MySQL

Languages: Python, Java, C

Tools & SDKs: Git, GitHub, VS Code, Postman
